## Information Assurance in Security and Privacy

### Call for Papers

Risk assessments, information assurance (IA) and system security are important research issues in digital environments especially in advancing human activities. IA includes the set of measures undertaken to protect and defend information and information systems by ensuring their confidentiality, possession, integrity, authenticity, availability and utility. This conference track will bring together researchers, practitioners, developers & policy makers involved in the many disciplines of information security and assurance to exchange ideas and to share the latest developments in this important field.

Papers are invited in the areas related to IA, including, but not limited to, the following topics:

- Theory, policy, governance, best practices
- Technology and risk management of security and privacy
- Security and Assurance in eHealth, e-/m-Commerce
- Outsourcing, Security in mobile/ubiquitous computing
- Scientific / statistical analysis on information assurance
- New idea and paradigms for security assurance and trust

All submissions must conform to the TIC-STH 2009 submission policy and should be in English language.
